

## Social gram

Socialgram - Is a cross platform, instant messaging application that enables its users to connect and follow each other on social networking services such as Facebook, Twitter and Instagram.

Socialgram - Provides text message, voice message, sharing of photos, videos and user location.

It provides friendstore where users can share their friends in three categories such as Top, popular and celebrities, and their profile disappears after 24 hours.

### Features

#### Instant messages

Socialgram supports different ways of instant messaging application including text message, voice message.

#### Post messages

Socialgram consists of post platform where users can post messages, photos and videos (one to many). Post platform includes video comment, voice comment and text comment message.

## Finding Friends

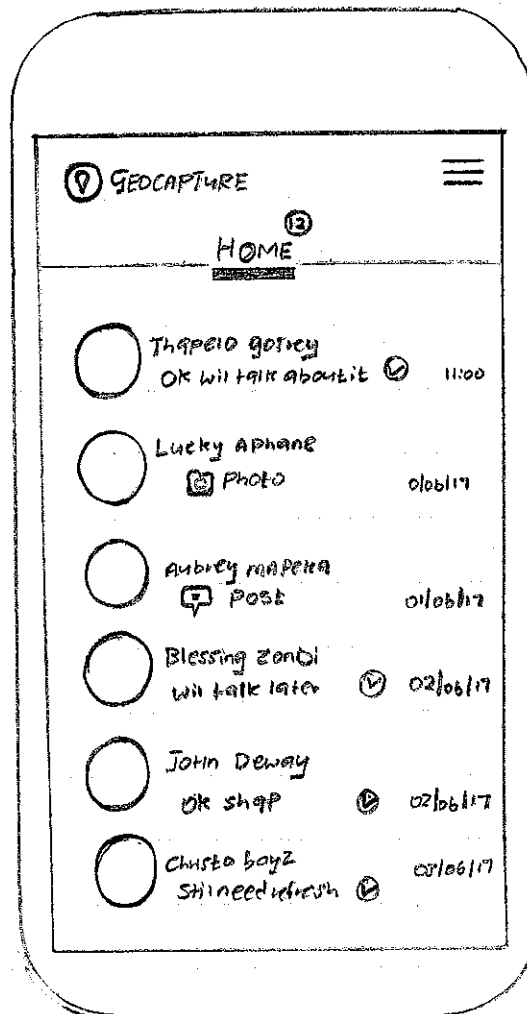

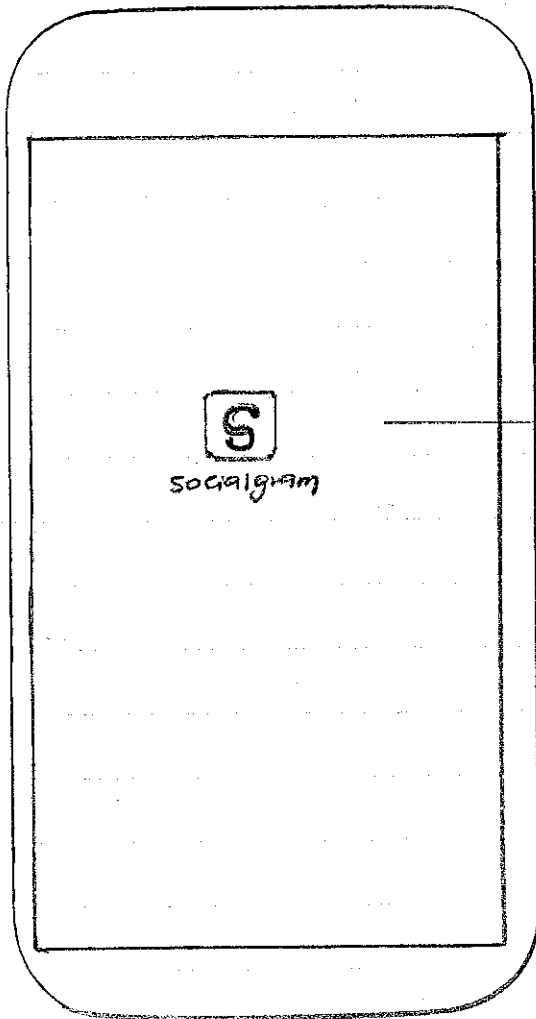

Socialpam - It uses the geocapture

Geocapture is a GPS automatic review, after tap to a geocapture button, It will view the locations where you are located and you have to select any location and there will help users to discover people through it. All people who are captured on a location database their profiles will disappear after 24 hours.

- Geocapture consists of nearby location and expand location where you will discover people.
